CORRECTIONS AND ADDITIONS.

Page ix. SUMMARY TABLE X. Section (*b*) Part 1. The eighth language should be *Kanarese*, not Karanese.

" " In the same section the figures opposite 18 (Central Pahári) and 19 (Márwádi) respectively, should be transposed.

Page 12. TABLE III., column 15. The figures for Rajputána should be 623,717, not 6,123,717.

" 34. TABLE IV. (2), column 33. The figures for 1881 in the N.-W. Provinces should be 4,199,800.

" 89. TABLE VI., column 9. Against Ajmér, 662 should be entered.

" 419. TABLE XI. (B). The figures against "Not returned" in the N.-W. Province States should be transferred to the line above.

N.B.—The number and distribution of villages in the Province of Bengal, as shown in Imperial Tables I. and III., and some of the details of Tables IX., XVI., and those relating to Infirmities, for the same Province, differ slightly from the corresponding Provincial return, as the latter was corrected after the former had been printed. Similarly, in Madras, the number of villages should be less by two than that shown in the Imperial Tables I. and III.

The return of Infirmities (Tables XII.-XV.) for Mysore does not include the small number found in Bangalore Cantonment and Civil Station, which, however, has been added to the corresponding return in the Caste Abstract printed in Vol. II. of these Tables.

* In this return no distinction is drawn between those who work and those whom they support by their work. The whole population depending upon the occupation is included, in order to indicate the respective sustaining power of the different orders.

† Order III. is intended to refer solely to those not in the employ of the State making the return, but it is probable that in some cases the servants of the State itself have been included.

‡ Order XXIII. includes those not enumerated by occupation in certain wild tracts of Rajputána, Kashmér, and the Bombay States.

TABLE I.

GENERAL STATEMENT.

EXPLANATORY NOTE.

In addition to the population shown in this table, which was dealt with in connection with the Census, the following tracts were roughly enumerated under a system of family or tribal registration during the years 1890–91, but the results being approximate only, have not been included in the Census tables. Other tracts on the Upper Burma frontier were duly enumerated, but, as in Manipur, the returns were destroyed in the subsequent disturbances. The population, however, save in Manipur, was roughly totalled at the time of Census, so the results are entered below :—

Tracts.	Approximate Population.
1. Upper Burma Frontier (in Bhámô and Kathá) - -	42,217
2. British Balôchistán, excluding Quetta and Railways, &c. -	145,417
3. Burma Frontier returns, since destroyed - - -	74,276
Total, British - - -	261,910
4. Sikkim - - - - - -	30,458
5. Shán States - - - - - -	372,969
6. Rajputána (Bhils, &c.) - - - - -	204,241
Total, States - - -	607,668
Total excluded - - -	869,578

2. Amongst the tracts included in this table are several which were not enumerated at the Census in full detail. The population of such tracts will be found excluded from the returns for which the information concerning it is not available, the necessary explanation being given on the title page of the table in question.

TABLE II.

VARIATION IN POPULATION SINCE 1881.

EXPLANATORY NOTE.

In this return a distinction is drawn in the case of both Provinces and States between the tracts included in the Census of 1881 and those now brought under the operations for the first time. The total population for 1891, as here given, falls short of that returned in Table I. by 43,716 persons, belonging to tracts in Rajputána not enumerated on the former occasion. Similarly, in order to get the full total of 1881, 309,380 persons must be added, representing the Rajputána Bhil tracts not enumerated in 1891; and 221,070 representing the then population of Manipur, the returns for which at the present Census were destroyed during the disturbances of March 1891. The Bombay Provincial total for 1881 is increased by 1908, the population of an alienated village, the return for which seems to have escaped compilation on that occasion, as it was believed to have been included in one of the Deccan States. A small transfer of 105 persons from Madras to Bengal, and another of 66,315 persons from the Orissa Kandh Maháls to the same Province, have been taken into consideration here. The 1881 population of the Jhánsi territory ceded by Gwalior since that year has been deducted from Central India and added to the North-West Provinces. The Chomehla parganah of Jháláwár, which is partly under Central India, has nevertheless been included in Rajputána with the rest of the State; but the Tonk parganahs in Central India, being wholly detached from Rajputána, are taken as part of the former agency. Similarly, in Table I., the detached parganahs of Gwalior and Indore in Meywár are included in Rajputána, though, as the 1881 population is not separately recorded, it has been omitted from Table II. as well as that for 1891.

TABLE III.

TOWNS AND VILLAGES CLASSIFIED BY POPULATION.

EXPLANATORY NOTE.

This return does not include villages recorded as such for revenue purposes only, but which contain no inhabitants. It shows separately, in the last column, the encampments of labourers, the railway employés, boating classes, and wayfarers, who were not enumerated on the night of the 26th February in any special unit, whether town or village. Aden is shown in the local return as a single unit, though it includes the detached population of Perim Island and the Shaikh Othmán and other Settlements on the mainland. Amongst the States, Hill Tipperah (*Bengal*) has been omitted, as the groups of population in the greater portion of that State are so small and migratory that it would serve no practical purpose to classify them. This omission reduces the total as compared with that given in Table I. by 1,589 villages and 137,442 people.

TABLE IV.

THE URBAN POPULATION AND ITS VARIATION.

EXPLANATORY NOTE.

In the returns dealing with the urban population the term town is applied to Municipalities and Cantonments, and in the North-West Provinces and Oudh to places under a local quasi-municipal regulation. In the States, the definition includes places having a population of 5,000, and which are of an urban character; but both here and in the Provinces the population standard cannot be strictly applied, and many places are for special reasons considered towns, though containing fewer inhabitants than the above quoted minimum, whilst, on the contrary, several others are excluded, though above the standard in population.

The population of a cantonment, port, railway station, &c., contiguous to a town, though outside municipal limits, is included in that of the town. In a few cases encampments, railway-gangs, travellers, &c., have not been tabulated with the population of any special place, and as the groups seemed to be, on the whole, of an urban character, they are added to this return in order to complete the total shown in Table I.

The first portion of this return shows every town of 20,000 inhabitants and over, and the rest by classes only. Where a place has been enumerated on this occasion for the first time, or where the last Census return is not available owing to great changes in town limits or other reasons, it is excluded from the class-total, so that comparison with the 1881 return may be accurately made. The second portion of the return is a summary, forming a link with Table V., which shows the classes of towns territorially, by Provinces and States. Here the nett class-variation from the return of 1881, irrespective of sex, is given next to the figures for that year with which it has to be compared.

* This represents the number only of the towns for which the population of 1881, according to the town limits of 1891, is available. Of the difference, namely 102 towns, 34 towns belong to territory not enumerated in 1881, and 68 were then enumerated, but under different conditions, which render comparison now impracticable.

* There are really only three towns in the first class in Bengal, but the two suburbs of Calcutta are counted as separate towns in the Provincial return, and they are so distinguished here also, but the population is subjoined to that of the parent town.

† The population of Amraoti camp is here deducted for the sake of comparison with the 1881 return, when it was omitted from the urban category.

TABLE V.

THE URBAN POPULATION BY PROVINCES, OR STATES, AND BY RELIGION.

EXPLANATORY NOTES.

The Urban population of 1891 only is dealt with in this return. The towns of 10,000 inhabitants and over in each Province or State are arranged according to population, with the distribution of the latter by religion. Smaller towns than these, except in the case of Assam, Coorg, and the Central Province States, are given in totals of the groups adopted in Table IV. As in that Table, too, the urban, though unclassed, population enumerated in encampments or along railways is shown below the Province or State returning it, in order to complete the total given in Table I.

TABLE VI.

THE POPULATION BY RELIGION.

EXPLANATORY NOTE.

The number of persons either not required to return their religion, or who neglected to give the information when asked for it, was only 42,578 out of the whole population. In parts of the Madras Agency Tracts and in the Gilgit division of Kashmir religion was not called for. The omissions were chiefly in Bengal.

For the returns by age, civil condition and education, the term Hindu has been held to include the Brahmo or Áryá Somáj as well as the comparatively recently introduced title of Áryá, which was returned (*a*) as a separate religion, (*b*) as a sect of Hinduism, (*c*) of the Vedic religion, and also (*d*) of the Sikh form of faith. In the returns above-mentioned, too, the few cases of Theism, Atheism, Agnosticism, Deism, Positivism, and Unitarianism, have all been included under the title of Minor religions, which also comprises those distinctly stating that they are of no religion, as distinguished from those who were not returned by religion at all. The full number of these cases, however, is not shown under this head, as in Calcutta, 7 Unitarians, 2 Agnostics, a Positivist, a Freethinker, a Specialist, and 23 persons returning themselves as of no religion, have been included amongst Christians in the local return and shown as such in the age, civil condition, and education tables.

The term Animistic has been adopted comprehensively for the religions of Forest tribes who do not accept the Hindu system, and have not been converted to Christianity or Islám. The distinction between some of these tribal forms of faith and Hinduism was, however, by no means clearly drawn at the enumeration, and the caste-returns of Rajputána, for example, will be found to show many Bhils as of the Hindu religion, though that tribe is elsewhere generally entered under Animistic.

TABLE VII.

THE POPULATION BY AGE AND RELIGION.

EXPLANATORY NOTE.

THE age was required to be returned in completed years, except in the Panjab and its Feudatories. In this Table, accordingly, the heading "0—9" includes all who have not completed their tenth year, and the next heading, "10—14" applies to those who have completed their tenth year and are under fifteen.

In the Panjab it is said to be customary for the people to return the current year of their age, so this practice was recognised at the enumeration, and the return was brought into harmony with that for the rest of the country by shifting the results one year back at the time of tabulation. The consequence of this process is, that all the excess which is thrown by an illiterate population on the multiples of five, in naming their ages, has been now transferred to the preceding period, giving a provincial aggregate strangely discordant with that of other parts of India. A special age-statement in annual periods, however, was prescribed, which, though not printed in the Imperial Series of returns, affords means of adjusting the above irregularity with approximate accuracy.

The comparatively few instances in which the age-column of the schedule was left blank have been adjusted for each religion in the Provincial or State total, but in certain wild tracts a return of age was not called for, and the population exempted has been excluded, accordingly, from these tables. The following statement shows the number thus omitted which are included in Tables I. and VI.

TABLE VIII.

THE POPULATION BY CIVIL CONDITION, AGE, AND RELIGION.

EXPLANATORY NOTE.

The return of civil condition under one of the three heads unmarried, married, or widowed, was called for. Divorced persons should, according to the instructions, have been included under the last denomination, and were so returned in Burma and several other Provinces, but in the rest of the country it was found that this title was unacceptable, and the persons concerned were returned accordingly, as either unmarried or married. In making the entries in this column of the schedule, the enumerator was specially instructed to accept the statement of the person returning, or of the head of the household to which that person belonged, without demur, in order to avoid questions as to the civil condition of re-married widows, or of persons united by the informal tie common to large numbers of the lower communities in various parts of the country, especially in Assam.

The table is divided into sections corresponding to those adopted for Table VII.

The population dealt with falls short of that returned in Tables I. and VI. by 24,815,811 persons, enumerated in tracts where the return of civil condition was not called for at the census. The following statement shows the distribution of the above population territorially and by religion :—

TABLE IX.

THE POPULATION BY LITERACY.

EXPLANATORY NOTE.

The enumerators' instructions, of which this return shows the results, were that each individual should be entered under one of the three titles, learning, literate, or illiterate; the first applies to those under instruction, whether they know how to read and write or not; but children only learning texts or the multiplication table, by rote, were probably excluded. Those who are able to read and write, but are not under instruction of any sort, come into the second category, whilst the last includes all who are neither under instruction, nor able to both read and write.

The return was called for from all Provinces and States except those mentioned below, so that the population dealt with amounts to 261,838,926, and 25,384,505 is excluded :—

TABLE X.

THE POPULATION BY PARENT-TONGUE.

EXPLANATORY NOTE.

A RETURN of the language ordinarily spoken in the household of the parents was obtained for all Provinces, except the Chittagong Hills in Bengal and a portion of the Agency tracts in Madras. It was also included in the schedules for all States except Kashmér, Rajputána, and Central India, but in the case of the two last the information was obtained for the Cantonment and Railway population.

The return deals, accordingly, with a population less than that shown in Tables I. and VI. by 25,196,013. Of these, 25,175,991 were not required to furnish the information in question, and 20,022 either omitted to fill up the column in the schedule or returned an entry which could not be identified. The marginal table shows the distribution of the population thus omitted.

Kashmér	2,543,952
Rajputána	11,999,386
Central India	10,219,126
Madras Agency (*Vizagapatam*)	306,241
Chittagong Hills	107,286
Total exempted	25,175,991
Return unrecognisable	363
„ not made	19,659
Total excluded	25,196,013

There are three sections of this table. The first shows the languages by linguistic classes; the second deals with their territorial distribution, whilst the third gives the linguistic distribution of each Province or State.

Some of the original entries have been combined or distributed, according to circumstances. For instance, the term *Urdu* is used to denote the dialect of Hindi returned by Músalmáns elsewhere than in the North of India, where the distinction cannot be fully drawn. *Nipáli*, or *Gurkháli* has been returned as the tongue of the Gúrkha troops serving in India, Assam, and Burma, so that it has been classed as Tibeto-Burman, except in the North-West Provinces, where it generally denotes a sub-Himalayan dialect of Hindi. Again, *Pahári*, in Bengal, may mean Nipáli, Santháli, Oraon, or the Mal-Pahádia dialect, according to locality. Sanskrit has been returned as a vernacular by a few persons, where Panjábi, Maráthi, or the silk weaver's Gujaráthi of Madras (Patnúli) is the true parent tongue. Latin was returned by a priest, apparently as being the tongue of his mother church.

TABLE XI.

THE POPULATION BY BIRTHPLACE.

EXPLANATORY NOTE.

This return was obtained from all Provinces and States, except small portions of the Madras Agency Tracts and Rajputána, and from the Gilgit Division of Kashmér, containing in all a population of 350,508. There were also 25,376 persons in the rest of India who failed to fill up the return correctly, so that the net population dealt with amounts to 286,847,547.

The demand made was for the entry of the District or State of birth, if the person was in India, and of the Country, if born elsewhere. In some instances a village which could not be identified was substituted for the former, whilst the required detail was omitted for the latter. Thus Roumania and Bulgaria were returned as Turkey: Europe, America, the United Kingdom, &c., instead of the country, and so on. The term "India," without further detail, may be taken, as a rule, to mean Hindustán, that is, the North-West Provinces and Oudh.

This return is divided into three sections. The first is a summary of birthplace for all India. The second is intended to show internal migration. The third merely shows the distribution over India of the foreign-born population.

TABLES XII., XIII., XIV., AND XV.

INFIRMITIES.

EXPLANATORY NOTE.

THE return was called for of persons who were (*a*) of unsound mind (Table XII.); (*b*) congenitally deaf-mutes (Table XIII.); (*c*) Totally blind (Table XIV.), and (*d*) Lepers (Table XV.). Special instructions were issued to exclude from Table XIII. those who were not both deaf and dumb from birth; from Table XIV. the one-eyed, and from Table XV. those suffering from leukoderma, which is sometimes called, by misapprehension, white leprosy.

Supplementary expansions of each of these tables, showing those afflicted by groups of caste, tribe, and race, as the case may be, will be found in the Caste Abstract at the end of this series. The present return is by age-period, preceded by a summary of all four tables, by Province or State.

The population dealt with is only 274,323,929, as the return was not required from Kashmér, the Central India States, a portion of Rajputána and of the Mahi Kántha States under Bombay, and North Lushai land, under Assam. Deaf-mutes, too, were not returned in the Rajputána States, so that in the case of this infirmity the population dealt with on that agency is, as for all the four tables in Central India, that of the cantonments and railways only. The following statement shows the scope of the return :—

PROVINCE OR STATE.	TOTAL.	Males.	Females.

TABLE XVI.

THE POPULATION BY OCCUPATION, OR MEANS OF LIVELIHOOD.

EXPLANATORY NOTE.

In consideration of the very defective return obtained at previous enumerations of those engaged in specified occupations, it was held advisable on this occasion to recognise no distinction in tabulation between the working and the non-working members of the community, and to widen the inquiry, so as to indicate the relative supporting power of the various occupations, by returning against each the whole population living by it, whether as workers or dependants. Special instructions were issued, however, to distinguish in the schedules the dependants from the rest, but this was merely a measure of administrative convenience, in order to meet objections to entering against members of one sex the name of an occupation practicable or permissible exclusively for the other. As has been stated above, the distinction has no statistical value, and, along with that of sex, and for the same reason, has been ignored in the Imperial tabulation.

The system of classification was devised to meet some, though not all, of the most glaring inconsistencies of the previous returns. As the Table stands, it presents defects obvious enough, but almost inevitable, when so complicated a subject is attempted through the rough and ready medium of a single column in a census schedule. There are, admittedly, points where the grouping if changed might have improved the accuracy of the return, but in several very important instances the occupation itself is returned under such varying titles that no system of classification can accurately delimit its numerical extent. Between pasture and agriculture, for example, the line is obscured by the entry of the children of cultivators, who watch the family cattle, sometimes as herdsmen, at others as cultivators or farm servants. Commerce and general dealing, again, are swelled by a number of retail vendors of special products, such as grain and groceries, who return their occupation simply as shopkeepers.

The return is subdivided into two sections, first, the general totals of Provinces and States are given for each occupation, as tabulated. They are grouped into Orders and Sub-Orders, with the addition of the distribution of these between the rural and urban parts of the community. The second division consists of a summary, by Orders and Sub-Orders, of the return for each Province and State, to which is added the information, wherever it was tabulated, of the number of persons of each Sub-Order who returned agriculture as their subsidiary occupation. As regards this last, however, it may be generally held that the return, in all but a few provinces, falls considerably below the number actually supplementing their resources in this manner. In the Provincial, and in most of the State volumes of this Census, the return of occupations will be found to be printed in detail of age-period and sex, for both rural and urban areas, and the connexion with the land, in the case of combined occupations, is also given in detail, such as occupant, tenant, labourer, &c.

In a few tracts, such as the North Lushai country, Gilgit, part of Rajputána and the Mahi-Kántha in Bombay, occupation was not returned, so the missing entries are recorded under the head of "Unspecified," in Order XXIII., Sub-Order 75 (a). In the same group, too, a home is found for the three or four hundred thousand people returned simply as "dependants."

* In the Provincial and State volumes this return is numbered XVII. and the Caste Table XVI.

SUPPLEMENTARY TABLE, A.

THE CHRISTIAN POPULATION BY RACE AND DENOMINATION.

EXPLANATORY NOTE.

In the instructions accompanying the schedule all Christians were asked to return their denomination, whilst as regards other religions this detail was left optional with the local administration. In order to secure as complete a return of Christian sub-divisions as possible, the various missionary bodies were addressed with a view to the issue of instructions from their different centres as to the correct entry to be made by their congregations. In most cases the entry was printed in the vernacular on a card which was to be shown to and copied by the enumerator, but the return makes it plain that this precaution was to a considerable extent disregarded.

The totals of the three races here recognised do not invariably agree with those given in the return of Castes, Tribes, and Races (Table XVII.), since there are some Europeans and Eurasians who have not returned the Christian religion; and, again, many Native Christians are there entered under the designation of their caste, tribe, or race, because the table deals with social or ethnic, not religious, distinctions.

The table is in three sections. The first shows the total number by race of each denomination returned; the second, its territorial distribution; and the third the denomination returned by the Christian community of each Province or State.
